EXEON®

EXEON®
CLEAN AIR FOR INDUSTRY

*High quality workbench
with 2-point extraction*

THE SCORPION™ RANGE

The **scorpion™** dual extraction bench has two adjustable extraction positions for maximum capture of product.

The Scorpion™ is fitted with a Nellie™ extraction arm.

WHY YOU SHOULD USE THE SCORPION™

The Scorpion™ minimises space and maximises extraction ability. Some of Scorpion's many benefits include:

- Dual extraction; the fan will draw air both from the own draft on the bench and the extraction arm.
- Fitted with an adjustable internal damper which balances the levels of extraction between the downdraft on the table and the arm.
- Can be fitted with Tiger™ extraction fan or connected to remote fan/filter system.
- Useful revolving plate option on worktop for convenient use with smaller objects.
- Heavy duty construction; a 5mm steel workbench covering a box-section frame. Built for the most demanding applications.
- May be fitted with fan, or fan and pulse-cleaning filter unit option. See individual unit data sheets for full details.

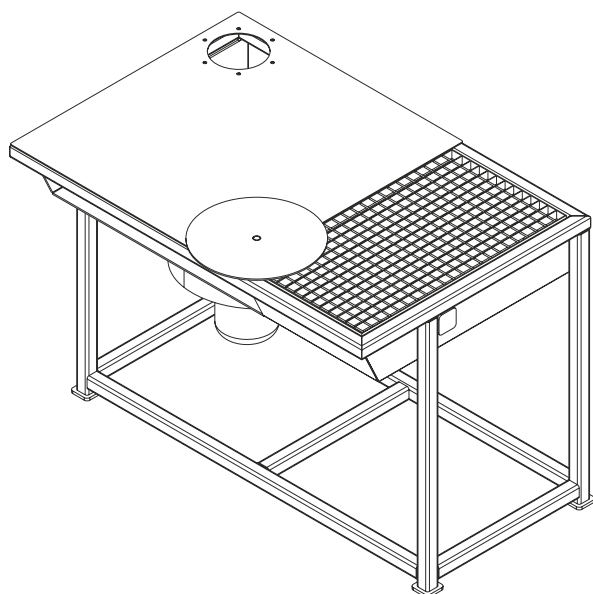

Standard Bench

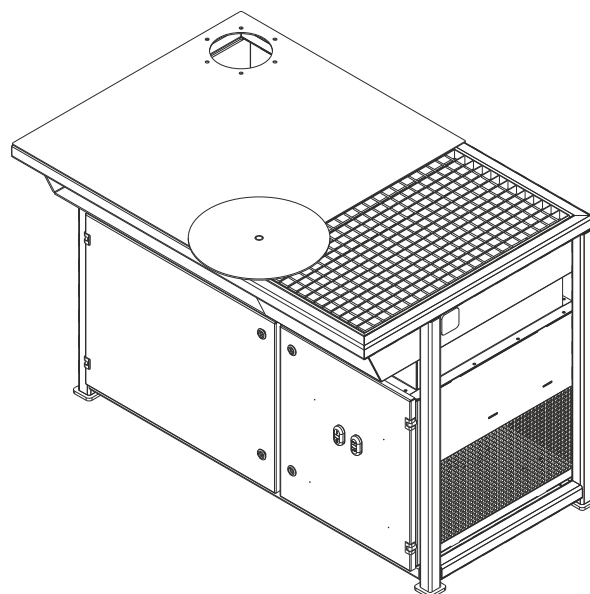

Scorpion Filter Bench

EFFICIENT. DUAL. BALANCED.

STANDARD BENCH

Available with or without under-bench Tiger™ fan unit. With extract grille and Nellie™ arm. Optional turntable available.

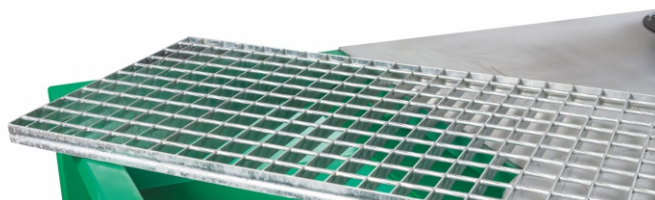

FILTER BENCH

The Scorpion™ filter bench incorporates a fan and a compact compressed-air pulse cleaning filter system below the bench. Carbon filters are also available for fume capture. With extract grille and Nellie™ arm. Optional turntable available.

A very convenient option which saves installing a separate filter unit.

SPECIALIST UNITS

Stainless steel units available, also specialist coatings and bespoke sizes to customers' requirements.

	Overall bench size (mm)	Bench height (mm)	Weight (no arm) (KG)	Design Airflow (KG)	Filter Grade	Electrical supply	Fan Power	Run (Start) current A	RPM	Noise level (dB(A) 1M	Compressed air supply
Scorpion™	1250 x 850	860	80	1100	n/a	n/a	n/a	n/a	n/a	n/a	n/a
Scorpion™ Fan	1250 x 850	860	120	1100	n/a	240V AC or 415V AC 50Hz	0.75KW	7(19) - 240V	2800	79	n/a
Scorpion™ Filter	1250 x 850	860	140	1100	F9 / 98% dust	240 / 415V AC 50Hz	1.1KW	2.5(14) - 415V	2800	79	4.5 bar min

**The Exeon® products are a high-quality range of
LEV equipment which include the following:**

Extraction arms

Dust collectors

Mobile extractors

Extraction bench

Extract fans

Suitable for most industries, including:
